Fear of excitement ll32. However, there is also evidence that very simple interventions can be effective in some contexts (e.g., providing instructions to influence online food purchases ll and se-then planning, to promote dental floss ll), and cost versus benefit issues should always be A consideration in the interventions project to promote health behavior change ll. Items 1 to 6 of the coding scheme identify whether the theory or predictors are mentioned and whether they are used to select receivers for the intervention, select or develop intervention techniques or adapt intervention techniques to participants, shows the characteristics of each intervention. Use of the theory and predictors of the different uses of the theory proposed by the coding scheme of Michie and Prestwich ll, theory or predictors were most commonly used to select or develop intervention techniques (k = 37). However, relatively few interventions employed these techniques, so the results should be treated with caution and form the basis for future research. We evaluated 549 full text articles on eligibility. On the other hand, an Internet-based intervention that produces a reliable change in fat intake has the potential to benefit a greater proportion of the population than an intervention directed to smokers. Modeling is usually used to increase self-efficacy ll, and current interventions tend to incorporate embedded videos that demonstrate the focal behavior in online intervention (e.g. ll, ll). Automated functions included: (a) the use of an enriched information environment (e.g. additional content and links, testimonials, videos or games), (b) automated custom feedback based on individual progress monitoring (e.g. comparison withor goals, reinforcement messages or coping messages) and (c) automated follow -up messages (for example, reminders, tips, newsletters, incentive). With this in mind, the gift gift .tenretnl .tenretnl eht aiv dereviled erew weiver tneserp eht ni snoitnevretni ethyrevile fo endo.
